KYOCERA / AVX

www.kyocera-avx.com

KYOCERA AVX is a leading international manufacturer and supplier of a vast portfolio of advanced electronic components, including capacitors, inductors, filters, resistors, couplers, diodes, and circuit protection devices, as well as a broad range of innovative sensor, control, connectors and antenna solutions. With 33 research, design, manufacturing, and customer support facilities in 16 countries around the world, KYOCERA AVX offers significant competitive advantages, including delivery and production capabilities optimized to suit each individual customer's just-in-time inventory requirements, and global engineering teams experienced in developing new-to-market product solutions especially designed to fulfil customer's unique application requirements.

LOCOSYS

LOCOSYS

www.locosystech.com

LOCOSYS is a R&D focused company with a very strong technical team propelling it forward as a leader in the GPS market. They have launched the MC-1612 and the MC-1010 GPS modules with the option of having Multi GNSS (Glonass, GPS, Galileo and Beidou) operation

These modules are pin-compatible to some widely used GPS modules in South-Africa. Locosys has also released the SP-2121, a low cost GSM module that is inter-connectable with their GPS modules

- GPS
 - Glonass
 - Galileo
 - Beidou
 - Mediatek

RAYSTAR

www.raystar-optronics.com

Raystar Optronics, Inc. is a leading manufacturer of OLED modules, TFT modules, and Dot Matrix LCD Display Modules in small-medium sizes. We are focusing in small order quantities and low minimum order quantities.

Raystar's OLED Modules / Monochrome OLED display, TFT Modules, and Dot Matrix Display Modules are ideal display for consumer and industrial applications such as Measurement devices, handheld devices, Audio, Automotive control panels, Medical devices, White goods or Home automation products and more. Raystar has been provides high quality and varies products to industrial customers in past and would aim to launch more innovated display modules products to our partner.

SENSIRION

www.sensirion.com

Humidity Sensors (RH&T)

First digital humidity sensor for precise, reliable and cost-effective humidity measurement and humidity control in a wide variety of OEM applications such as consumer goods, automotive and HVAC applications.

Liquid Flow Sensors

High precision liquid flow sensors and liquid flow meters with measurement ranges down to nanoliters per minute. Designed for medical devices, HPLC, biotech and laboratory applications.

Mass Flow Meters & Controllers for Gases

Mass flow meters and mass flow controllers for accurate and fast measurement and control of gas flow. Successfully used in different OEM applications (e.g. medical devices, analytical instruments, etc.)

Differential Pressure Sensors

Differential pressure sensors for gases. Measures accurately and offset free down to very low rates of differential pressure. Designed for demanding medical and HVAC applications.
